

## **Week 6 individual reflection Oscar Palmqvist**

### **1. What do I want to learn or understand better?**

I want to understand other scrum tactics than the ones we utilize today, I have heard of scrum poker for example. I also want to understand agile practices as a whole on a deeper level, not just scrum.

### **2. How can I help someone else, or the entire team, to learn something new?**

By sharing my prior experiences and capabilities from working with agile and general software development.

### **3. What is my contribution towards the team's use of Scrum?**

I have helped the team with working within agile principles, such as “the thin slice of cake”. Trying to teach people to work in steps, focusing on the largest value creation right now. People are quite used to determining the end point and concrete goal at the start.

### **4. What is my contribution towards the team's deliveries?**

Extending the database and creating functionality for interacting with it.
