

Week 2 individual reflection Oscar Palmqvist

1. What do I want to learn or understand better?

I want to understand better how to structure user stories and tasks and how to work iteratively without aiming for a far away abstract goal.

2. How can I help someone else, or the entire team, to learn something new?

By sharing my prior experiences and capabilities from working with agile and general software development.

3. What is my contribution towards the team's use of Scrum?

Trying to teach people to work in steps, focusing on the largest value creation right now. People are quite used to determining the end point and concrete goal at the start.

4. What is my contribution towards the team's deliveries?

Defining the project scope and definition.
