

W.4 Individual reflection – Eugene

... the current situation or "what is" (A), ... what you want the situation to be or "what might or should be" (B), and ... a plan for getting from where you are to where you want to be or "feedback designed to reduce the gap" (A -> B).

What do I want to learn or understand better?

After watching SQLite tutorials as well as exploring an older Android application that uses SQLite, I gathered fundamental knowledge about SQLite. I wish to continue learning even more about SQLite and advance database even more. To achieve that I will dig deeper into another Android applications that use SQLite. If needed, I will search for more SQLite tutorials on the internet.

How can I help someone else, or the entire team, to learn something new?

This week I helped two of my teammates with setting the Android Studio environment. In addition to that I demonstrated and explained them another Android application and showed how it can be used a template for this project.

What is my contribution towards the team's use of Scrum?

This week, we as a team have assigned user stories and their velocities. I have chosen the ASM001: Database Tables user story to work on. Unfortunately, I could not complete this user story by the end of the week, therefore I carry on developing the database in the upcoming week.

What is my contribution towards the team's deliveries?

This week I began working with the ASM001: Database Tables user story. As a result of an uncomplete UML diagram and other team member's different perspective of how a Movie class should be composed, I could not complete my user story by the end of the sprint. The goal for next week is to continue working on the UML diagram for the Movie class and to agree with my team whether a Movie class should hold all the attributes for its Review or if Review should be a separate class.
