

1. what do I want to learn or understand better?

I would like to understand how the backend and GUI will be connected later in the project. To understand this, I will ask questions to my team members.

2. how can I help someone else, or the entire team, to learn something new?

I want to continue to collaborate and discuss our work with my teammates.

3. what is my contribution towards the team's use of Scrum?

During our sprint planning meeting we discussed what our focus should be for the week and tried to think about what would create most value for the customer at this stage in the process. We talked about this with our supervisor, and he thought that our way of thinking was good. I want to bring this way of thinking into our upcoming meetings.

4. what is my contribution towards the team's deliveries?

During this week I missed some of our planned meetings and therefore I did not contribute to our deliveries as much as some of my teammates. I hope that our schedules will be easier to sync in the coming weeks so I can contribute more towards our deliveries.
