

**1. what do I want to learn or understand better?**

This week we started to write user stories. I feel like I have got a general idea about how user stories are supposed to be structured, but I would like to learn more about this process. During our meeting today I had the opportunity to ask clarifying questions and discuss this topic with the team. I want to learn more by continue to do this and reflect over my learning in this area in the upcoming weeks.

**2. how can I help someone else, or the entire team, to learn something new?**

I want to continue to thank my group members when they have helped me with something so they will be motivated to continue to do that.

**3. what is my contribution towards the team's use of Scrum?**

This first sprint was very messy when it comes to structure of our working process. During our meeting today I asked for a better structure, and we decided how to make the different stages of the sprint clearer. I want to continue to reflect over how our use of Scrum can be easier for me to understand and discuss this with the group.

**4. what is my contribution towards the team's deliveries?**

Today we did our first team reflection. I was being active in the discussion around the topics for the reflection, this is something that I want to continue to do. I hope that it will be easier to do the weekly team reflection in the coming weeks and that I can continue to contribute to that.
