

# W.1 Individual reflection – Eugene

... the current situation or "what is" (A),

... what you want the situation to be or "what might or should be" (B), and

... a plan for getting from where you are to where you want to be or "feedback designed to reduce the gap" (A -> B).

## What do I want to learn or understand better?

I have no prior knowledge or experience in neither Agile software management nor Scrum. My goal is to learn what Scrum is about and how to apply that knowledge in our project. To achieve this, I will have to attend all lectures and exercises, take notes and be active in group meetings and discussions. Besides that, I will browse the Internet for more examples of Scrum in real life, by reading articles and watching YouTube tutorial on this subject.

## How can I help someone else, or the entire team, to learn something new?

At the moment, the group has not started any project yet. Instead, we actively participate in exercises on how to use Scrum. The only way I can help someone else in this situation is by recommending relevant Scrum tutorials, explaining the exercise instructions and be friendly to everyone. In the future, I want to help people with Scrum based questions directly, without needing to send them tutorials.

## What is my contribution towards the team's use of Scrum

There have been no projects, this week. However, I was assigned as Scrum Master during the Mona Lisa exercises. The main difficulty was to get the team to listen to my suggestions instead of ignoring them. To improve our use of Scrum, we need more team building exercises to get to know each other and figure out who is more suitable to which role.

## What is my contribution towards the team's deliveries?

My contribution towards the team's deliveries has been to attend during exercises and group meetings. In the future, when the group project starts, I would like to share my ideas for the project and to actively participate in software development.
